DEAD-MAN SWITCH DECLARATION

Therapy & Voluntary Deactivation Service · Client declaration form

Purpose of this form
This fictional clinic form records a person's understanding of a digital, mechanical, or personal contingency mechanism sometimes called a “dead-man switch”, and their request to review, pause, transfer, or deactivate it. It is a discussion aid—not proof of diagnosis, legal authority, or technical deactivation. No action should be taken without appropriate verification and informed consent.

1. CLIENT DETAILS

Full name	**Preferred name**
Date of birth (optional)	**Date of declaration**
Preferred contact method	**Safe contact details**

2. SWITCH DESCRIPTION

Describe the mechanism in your own words. Do not include passwords, access keys, recovery codes, or other secrets on this form.

What do you call the switch?
Where is it managed or stored? (e.g. device, account, service, document)
What event or condition activates it?
What does it do when activated?

3. REQUESTED REVIEW

■ I want information and a review before deciding.	■ I want the switch temporarily paused, if safe and technically possible.
■ I want to explore transfer of control to a trusted person.	■ I am requesting permanent deactivation/removal, subject to verification.
■ I am unsure what the switch does and want help understanding it.	■ I want to withdraw or revise an earlier request.

4. SAFETY, CONTINGENCIES & SUPPORT

Before any change is made, consider whether the switch protects data, property, another person, or an important process. Identify any consequences of pausing or removing it.

What could happen if the switch is paused or removed?
Are there people, accounts, files, or responsibilities that may be affected?
Is there a safer alternative (e.g. a check-in schedule, shared access, or documented handover)?

Trusted support person (optional)

Name / relationship	**Contact method**

DECLARATION & CONSENT

Please read each statement and initial where indicated.

5. CLIENT DECLARATION

■ I have described the switch as accurately as I can and have not written passwords or secret access credentials on this form.	Initials: _____
■ I understand that a review does not itself pause, disable, delete, or transfer the switch.	Initials: _____
■ I have had an opportunity to ask questions about possible consequences, including loss of access, notifications, data release, or interruption of a process.	Initials: _____
■ I understand that any technical change may require the account owner, service provider, administrator, or another authorised person.	Initials: _____
■ I understand that I can ask to pause the review, seek independent advice, or withdraw this request before action is taken.	Initials: _____
■ I consent to discussing the options with the named practitioner or authorised service representative. This consent does not authorise access to accounts or devices beyond the scope separately agreed.	Initials: _____

6. REVIEW OUTCOME — STAFF USE

er review required ■ Referred to technical administrator ■ Deferred	
	Target review date
t applicable Details / verification reference (no passwords)	

7. SIGNATURES

Client signature	**Date / time**
Practitioner / reviewer signature	**Role / organisation**

Witness or support person (optional)	Date

Important: This is a fictional, general-purpose template. It is not a clinical assessment, legal release, identity-verification process, or technical instruction. Do not use it as the sole basis for disabling a safety-critical, security, or third-party system. Use the relevant provider's authorised process and obtain qualified advice where needed.
